Work Experience Summary

- great experience with: PHP, Symfony, Laravel, Lumen, Docker, JavaScript, Vue.js

- familiar with: React, Node.js, AngularJS, Backbone.js, TypeScript, RabbitMQ, Kubernetes

- experience of writing tests using PHPUnit, Behat, Codeception

- delivering projects, code quality control and documentation creating

- debugging and code refactoring

- with with payment systems like WebMoney, WebPay, PyaPal, Stripe, Plaid, PaySimple

- work with databases like MySQL, MariaDB, PostgreSQL, SQLite, ElasticSearch, Cassandra, InfluxDB, Redis, Memcached

- having experience with CQRS. Familiar with DDD, TDD, Saga

- configuring web servers like Apache, nginx, IIS

- optimizing and monitoring application performance using ELK, Grafana, Graylog

- collaborating with the DevOps team to maintain solutions in production

Projects Experience

Period	From 08.2020	Till now
Project Roles	Back-end developer	
Project	Local marketplace	
Tasks executed	Introduce paid proposals for executors, implement API for main window for mobile app, develop product accessories API, product SEO, API for auto reviews, integrate subscriptions with local payment system, supporting over 20 projects and their codebase, migrate code to latest PHP versions, rerefactoring and bug fixes	
Environment	PHP, Laravel, Lumen, Behat, MySQL, Cassandra, InfluxDB, Redis, Docker, Behat, RabbitMQ, Go	

Period	From 05.2020	To 08.2020
Project Roles	Back-end developer	
Project	Solution for restaurant business	
Tasks executed	Develop admin panel for managing restaurants. Admin panel helps add restaurant's menu, users, customers, locales, currencies. Also there is place for set time slots and count of dishes that a resaurant can handle per period of time	
Environment	PHP, Symfony, PHPUnit, PostgreSQL, Docker, GCE, React Native	

Period	From 01.2020	To 05.2020
Project Roles	Full-stack developer	
Project	Portal for handling docs and reports	
Tasks executed	Integration with .NET solution. Generating reports tree based on tree structure in desctop app. The tree has basic tree acrions like delete, add, move nodes, read their properties. Print PDF from Crystal report template using PHP	
Environment	PHP, Codeignitor, Microsoft SQL Server, Vue.js, Type Script	

Period	From 10.2019	To 01.2020
Project Roles	Back-end developer	
Project	Platform for fleet management	
Tasks executed	Developing aggregated reports based on a truck measurements like speed, distance, fuel	
Environment	PHP, Symfony, Behat, PostgreSQL, Redis, Node.js, RabbitMQ	

Period	From 06.2019	To 10.2019
Project Roles	Back-end developer	
Project	Integration e-shop mobile app with SOAP server	
Tasks executed	SOAP server is a proxy server beetwen mobile app and e-shop. Developing authorization, CRUD for profile, addresses, cart handling, bug fixes and refactoring	
Environment	PHP, PostgreSQL, Spryker, Codeception, PostgreSQL, TravisCI	

Period	From 10.2018	To 05.06.2019
Project Roles	Full-stack developer	
Project	Platform for managing guarantees	
Tasks executed	Developing project from scratch, creation of functional components for further usage and company/user management, guarantees management, user authentication and registration	
Environment	PHP, Laravel, PHPUnit, Vue.js, MySQL, Bitbucket Pipeline	

Period	From 08.2018	To 10.2018
Project Roles	Full-stack developer	
Project	E-shop with company/user management based on Spryker platform	
Tasks executed	Developing registration and customer profile, search optimization, bug fixes and refactoring	

Environment	PHP, Symfony, Silex, Spryker, Vue.js, PostgreSQL, Elasticsearch, Redis, RabbitMQ, Jenkins, TravisCI

Period	From 09.2017	To 08.2018
Project Roles	Full-stack developer	
Project	System for management of applications for sales manager	
Tasks executed	Database design and development features like registration, login, task creating, calendar handling on backend side. Custom forms, modal windows, tables on front-end side. Bug fixes and refactoring	
Environment	PHP, Symfony, Behat, PostgreSQL, React, Material Design	

Period	From 09.2017	To 04.2018
Project Roles	Back-end developer	
Project	Online property management tool for landlords to fully manage their properties on their own. It is a user-friendly website offering landlords and property managers the ability to manage all of their properties with pay-as-you go services for a low cost. Every landlord will have access through their registered account to safely and securely manage as many properties as needed	
Tasks executed	Database design, admin dashboard for handling properties and customers, payment system integration of with Stripe and Plaid	
Environment	PHP, Symfony, MySQL, JavaScript, JQuery, Stripe, Plaid, Redis	

Period	From 04.2017	To 07.2017
Project Roles	Full-stack developer	
Project	Document management system	
Tasks executed	Scan photo by camera, import photo to gallery. Implementing REST API for managing users and documents	
Environment	AngularJs, Apache Cordova, SCSS, HTML	

Period	From 02.2017	To 09.2017

Project Roles	Back-end developer
Project	System for medical questionnaire
Tasks executed	Multistep questionnaire. Handling applications carried out by workflow and notifications which configured in admin panel. Also the systemincludes CMS with custom templates, news module, feedback section, role management and ACL
Environment	PHP, Symfony, OroPlatform, MySQL, Redis, Backbone.js

Period	**From 09.2016**	**To 02.2018**
Project Roles	Back-end developer	
Project	System for message exchange between fans and celebrities using embedded chat on celebrities' web site	
Tasks executed	Admin dashboard, celebrity panel, embedded chat between celebrity and fans, upload files in chat, render earning graph, integration with payment system, user analytic solution based on Piwik	
Environment	PHP, Symfony, MariaDB, JS, JavaScript, jQuery, Bootstrap	

Period	**From 05.2016**	**To 09.2016**
Project Roles	Back-end developer	
Project	Platform for brokers and insurers	
Tasks executed	Developing generation XSD schema to HTML fields, form fields validation according to XSD, generate XML file from submitted data accorting to XSD file	
Environment	PHP, Symfony, MySQL, JavaScript, jQuery, Gulp, Bower, Bootstrap	

Period	**From 01.2016**	**To 05.2016**
Project Roles	Back-end developer	
Project	Tracking system for the grants	

Tasks executed	Track grants for grantors and grantees, create dynamic reports. REST API for budget handling, users management
Environment	PHP, Symfony, PHPUnit, MySQL

Period	**From 08.2015**	**To 09.2015**
Project Roles	Back-end developer	
Project	Landing page for oil company	
Tasks executed	Integration with Google Maps	
Environment	PHP, Silex, Google Maps API	

Period	**From 07.2015**	**To 08.2015**
Project Roles	PHP developer	
Project	E-commerce solution	
Tasks executed	Integration e-shop order and cart handling with 1C: Enterprise (see https://en.wikipedia.org/wiki/1C:Enterprise))	
Environment	PHP, MySQL	

Period	**From 05.2015**	**To 07.2015**
Project Roles	Back-end developer	
Project	Football club web-site	
Tasks executed	Developing and supporting REST API for further using by mobile app. Implementing app notification if there are new information appear on web-site	
Environment	PHP, PHPUnit, MySQL, APNS, GCM	

Period	**From 03.2015**	**To 05.2015**
Project Roles	Back-end developer	

Project	Supporting e-commerce solution
Tasks executed	Support web-site including bug fixing and some content management
Environment	PHP, MySQL, JavaScript

Period	**From 03.2015**	**To 08.2016**
Project Roles	Back-end developer	
Project	E-commerce solution	
Tasks executed	Supporting and assessment requirements for e-commercial solution. Developing new features on front-end like forms. Integration with external service via SOAP, implementing REST API, bug fixes on back-end	
Environment	PHP, JSONP, SOAP, MySQL, JavaScript, Backbone.js, jQuery	

Period	**From 10.2014**	**To 02.2015**
Project Roles	Back-end developer	
Project	E-commerce solution	
Tasks executed	Developing module to reassign new order to existing customer by checking their email in the order. Notify customer via email if reassign occurs	
Environment	PHP, Magento, MySQL, JavaScript, Prototype	

Skills

Skills		Experience, **in years**	**Level** (Expert/ Advanced/ Intermediate/ Elementary)	Last used, **year**
Operating Systems				
	MS Windows	15	Intermediate	2022

	Ubuntu	4	Intermediate	2022
	macOS	2	Intermediate	2022
Relational Database Management Systems (RDBMS)				
	MySQL 4.1 – 5.x	7	Advanced	2022
	MariaDB	1	Elementary	2017
	PostgreSQL	4	Intermediate	2020
	Desktop DB (MS Access)	1	Elementary	2014
	MongoDb	2	Intermediate	2022
	Cassandra	2	Intermediate	2022
	InfluxDB	1	Elementary	2022
Programming Languages				
	JavaScript	7	Advanced	2022
	PHP	7	Advanced	2022
	Go	1	Elementary	2021
	TypeScript	1	Elementary	2020
Programming technologies				
	HTML/DHTML	7	Advanced	2020
	XSLT/XPath	1	Intermediate	2016
	XML Web Services	7	Intermediate	2022
	AJAX	7	Advanced	2019
	Node.js	1	Elementary	2019
	Centrifuge.js	1	Inermediate	2017
	NPM	1	Inermediate	2018
	Bower	1	Elementary	2017
	Gulp	1	Elementary	2018
	SOAP	4	Intermediate	2019
	XML	4	Advanced	2016
	XSD	3	Advanced	2016
	JSONP	2	Advanced	2016
	JSON	7	Advanced	2022
Application Servers and Middleware				

	IIS	1	Elementary	2020
	Apache	3	Advanced	2018
	Nginx	7	Advanced	2022
Virtualization				
	Docker	6	Advanced	2022
	Kubernetes	1	Elementary	2020
	Vagrant	1	Intermediate	2019
Source Control Systems				
	Git	7	Advanced	2022
Test Automatization Tools				
	PhpUnit	6	Advanced	2022
	Behat	5	Advanced	2022
	Codeception	2	Intermediate	2019
Frameworks				
	Symfony	6	Advanced	2020
	Laravel	5	Advanced	2022
	Express	1	Elementary	2017
	Vue.js	2	Advanced	2020
	Backbone.js	1	Intermediate	2017
	AngularJS	1	Intermediate	2018
	React	1	Intermediate	2018
Other				
	Composer	7	Advanced	2022
	REST server	7	Advanced	2022
	Twig	5	Advanced	2018
	Smarty	1	Intermediate	2015
	Memcached	1	Intermediate	2017
	Redis	7	Advanced	2022
	RabbitMQ	6	Intermediate	2022
	Elasticsearch	5	Intermediate	2022
	PWA	1	Intermediate	2018
	OAuth	1	Intermediate	2022

	JWT	6	Intermediate	2022
